INTRODUCTION:

Registration No.: ASAP 7/7/85 Registration Date: 31 May 1985

Collection Size: 4.2m (35 archive boxes and some oversize materials)

Collection Dates: 1926 - 1985

The archival materials documenting the life and work of M.J.D. White are divided into two groups. The first is based on his insect collection and cytology microscope slides and includes the relevant diaries, notebooks and maps that document the collection of insect specimens. These materials are lodged at the National Insect Collection, **CSIRO** of Entomology, Black Mountain, Division Canberra, and a copy of the list, with a detailed description of the diaries, compiled by the Australian Science Archives Project, is to be found in Series 11 of this All other materials comprising correspondence, publications, photographs, slides, working files and draft manuscripts have been deposited with the University of Melbourne Archives. The unfortunate shuffling of some sections of the papers made sensible arrangement of the collection difficult though this was finally achieved, as as possible, through careful and detailed listing of the files. comprehensive index prepared by Doug McCann.

Note: This Guide contains a Career Summary (pp 3-6), a Table of Contents and record series summary (pp 7-8), the detailed description of the files (pp 9-85), an Index (pp 86-110) and Abbreviations (p 111). Throughout the Handlist the "File Title" is, as close as possible, a transcription of the title given by the creator of the file. Extra description of the file is given in square brackets. The Handlist and Index are a guide to the collection and not a comprehensive reflection of its contents.

SERIES 7 WORKING PAPERS AND DRAFT MANUSCRIPTS

Box 21

Note: Series 7 is in two sections. <u>Section</u> 1 consists of working papers, research records, notes and some correspondence and draft manuscripts: the material is relatively unsorted due to widespread interleaving of pages. Where possible, files have been organised chronologically and given titles from White's organisation or notes. Others are titled "Assorted", and where obvious file-overlap occurs this has been indicated. <u>Section</u> 2 consists of draft manuscripts and typescripts isolated from Section 1 and other parts of the collection. Other manuscripts are located at 3/27, 3/34, 4/76, 4/82.
