NAME OF COLLECTION	WOOD, IAN JEFFERYS (1903-1986)
ACCESSION NO	1987.0035
CATEGORY ACTIVITY	University, individuals Medical practitioners
DATE RANGE	1902-1985
SIZE OF COLLECTION	240 cm. (23 archives boxes)
HISTORICAL NOTE	Wood graduated M.B. B.S. in 1927 and M.D. in 1930 at the University of Melbourne. After some years at the Melbourne and Children's Hospitals and two years' experience in Britain he had by the outbreak of the war entered upon research involving blood transfusions and blood preservation techniques leading to the establishment of blood banking in Australia. After war service in various military hospitals in the Middle East, Australia and New Guinea, he joined the Walter and Eliza Hall Institute of Medical Research as Assistant Director and Head of the Clinical Research Unit in association with the Royal Melbourne Hospital. (See ASAP list "The Papers of Ian Jefferys Wood").
DATE OF TRANSFER	28/05/1987
ACCESS CONDITIONS	Access: Open
DESCRIPTION	Files relating to Wood's biographical details, autobiography, autoimmune disease, blood transfusion, hepatitis, hydatid, Interferon, malaria, radiation, snakes and spiders, various medical colleagues (including Sir F. Macfarlane Burnet) and organizations. Files may contain correspondence, lectures, photographs, publications, working papers, reports, newspaper and journal extracts, etc. Boxes of photographic slides.
NOTE ON LISTING	Material relating to the family from files 1/11, 4/4, 4/5, 4/6, 9/24, and 9/37 was returned to the family, at their request, in September 1987.

INTRODUCTION:

Registration No. : ASAP 26/2/87
Registration Date: 25 May 1987
Collection Size : 23 (12cm) archive boxes (2.76m)
Collection Dates : 1902 - 1985

The collection was surveyed at the home of Lady Edith Wood in April 1987 and then subsequently transferred to the ASAP office for archival processing.

'Ian Wood's highly successful tenure as Head of the Clinical Research Unit of the Walter and Eliza Hall Institute was from 1946 to 1963, during which he was also Deputy Director of the Institute. He was a founding father of clinical research in Australia. He lived for discovery, with an approach based on detailed observations on disease, intuitive and descriptive rather than reductionist, and relying strongly on clinical and histopathological correlation, and he was a great believer in technical innovations. Ian Wood was more than thorough - meticulous in fact - in organization of his Unit, research activities, preparation of results for presentation at meetings, or in writing scientific papers. He gently let this rub off onto numerous junior colleagues. His organizational flair led to his development of massive blood transfusion and establishment of blood banking in Australia, in the 1930s. He developed blood banking for the Australian Armed Forces in World War II.'

Notes on Sir Ian Wood, from I.R. Mackay.

Material relating to the family from files 1/11, 4/4, 4/5, 4/6, 9/24 and 9/37 was returned to the family, at their request, in September 1987.

Note: Throughout this Handlist the 'File Title' is, as closely as possible, a transcription of the title given by the creator of the file. Extra description of the file is given in square brackets. The Handlist and Index are a guide to the collection and not a comprehensive reflection of its contents.

CAREER SUMMARY: Ian Jefferys Wood

- 1903 : Born 5 February at Albert Street, East Melbourne.
(An only child, his early education was given by his mother, Blanche Isla (Outhwaite), at home. His father, A. Jeffreys Wood, was a medical graduate of the University of Melbourne and specialized in the treatment of sick children.)
- 1911 - 1921 : Melbourne Church of England Grammar School. (Junior and secondary education; fellow students included G.W. Leeper and R.R. Garran.)
- 1922 - 1927 : University of Melbourne Medical School. (M.B. B.S. with First Class Honours in medicine; as an undergraduate student he attended classes given by D. Rivett (chemistry), W.A. Osborne (physiology), R.J.A. Berry (anatomy) and P. MacCallum (pathology). Later, in the hospital wards, he was instructed by H. Turnbull, S. Sewell, A. Newton, L. Hurley, V. Hurley and I. Maxwell. Fellow students included G. Robertson and E.V. Keogh. He played cricket and hockey in the University teams and was awarded a University of Melbourne Blue.)
- 1927 - 1928 : Melbourne Hospital and Children's Hospital, Carlton: Resident medical officer.
- 1928 : Melbourne Hospital: Resident medical officer under Alan Newton (surgery) and Hume Turnbull (medicine).
- 1929 - 1932 : Children's Hospital, Carlton: Resident medical officer, then Medical Superintendent in 1930. (Worked with F.M. Burnet on bacteriophage studies for controlling Flexner organisms. A medical student in the hospital at that time was E.E. Ford.)
- 1932 : University of Melbourne (M.D.).
: RMS Orontes (Assistant ship's surgeon en route to England in March-April).
- 1932 - 1934 : London, England. (Attended a course at the London Hospital in preparation for the membership examination of the Royal College of Physicians. He worked as house physician at the Hospital for Sick Children, Great Ormond Street, London and worked with F. Fraser, professor of medicine at St. Bartholomew's Hospital, London. He became engaged to Edith Cooke.)
- 1934 : RMS Orford (Assistant ship's surgeon en route to Australia).
- 1934 - 1939 : Children's Hospital, Carlton: Clinical assistant and then physician to outpatients. (Developed techniques for the intravenous infusion of blood and glucose-saline solutions in anaemic and dehydrated children and babies.)
: Royal Melbourne Hospital: Associate assistant under H. Turnbull with facilities for clinical research.

- : Walter and Eliza Hall Institute of Medical Research
(Marion Carty Research Fellow under C. Kellaway
studying patients with ulcers of the stomach or
duodenum who suffered severe haemorrhage and
required blood transfusions. Blood preservation
techniques were refined resulting in the
establishment of a blood bank at the Institute.)
- : 59 Collins Street. (Private medical practice
specializing in blood transfusions and
continuous intravenous glucose-saline drip
treatment for anaemic and dehydrated patients.)
- 1937 : Royal Australasian College of Physicians (Fellow).
- 1939 - 1963 : Royal Melbourne Hospital (Honorary Physician).
- 1939 - 1945 : Australian Imperial Force (AIF) serving as a
medical officer.
- : Commenced as a junior officer under Major General
Rupert Downes, Director General of Medical
Services, Victoria Barracks, Melbourne, assigned
to the development of blood transfusion
equipment.
- 1940 : Joined the 2/2nd Australian General Hospital and
embarked on the SS Strathaird for the Middle
East on 13 April and was away from Australia for
two years. Worked with various Australians
including C. Disher, E. Dunlop, E.V. Keogh,
W.W.S. Johnston, H. McLorinan, E. Britten-Jones,
L. Lindon, A. Sage and H. Todd.
- : Seconded to the 12th British General Hospital in
Jerusalem and then to the 10th British General
Hospital at Helmier near Cairo working with N.H.
Fairley.
- : Returned to 2/2nd AGH at Gaza on 22 September which
then moved to Kantara to receive the first
Australian casualties from the Battle of Bardia
and Tobruk.
- 1941 : Transferred in August to the 2/4th AGH at Tobruk.
- : Contracted hepatitis in October and was evacuated
to Alexandria.
- 1942 : Returned to Australia on the American troop ship
Mount Vernon in March.
- : Went with the 2/2nd AGH in November to Hughendon in
central Queensland to set up an 800-bed tented
hospital to receive patients from New Guinea and
the Pacific Islands.
- : Member of the British Empire (Military).
- 1943 : Moved the hospital in January to Rocky Creek on the
Atherton Tableland where it increased in size to
1000 beds, treating malaria, dysentery and battle
cases. The hospital was involved in a large
research project under the guidance of N.H.
Fairley and E.V. Keogh investigating the
efficacy of three antimalarial drugs (quinine,
atebrin and sulphadiazine) to reveal the best
for adoption by the forces. The other major
collaborator in the project but located in
Cairns was R. Andrew.

- 1944 : Transferred early in the year to be the officer commanding the Medical Division at the 115th Heidelberg Military Hospital, Melbourne. He was involved in the first use of penicillin at the Hospital.
- : Royal College of Physicians, London (Fellow).
- : Posted at the end of the year as Colonel commanding the 2/7th AGH in Lae, New Guinea, taking command in January 1945.
- 1945 : Appointed to form a Clinical Research Unit at the Walter and Eliza Hall Institute of Medical Research by F.M. Burnet while still in Lae.
- : Returned to Melbourne, Australia, in August.
- 1945 -1963 : Walter and Eliza Hall Institute of Medical Research: Assistant Director and Head of the Clinical Research Unit in association with the Royal Melbourne Hospital.
- 1946 : Carnegie Travelling Fellow, January - April. (The primary objective was to visit the clinical research units of the Harvard Medical School which were regarded as the world leaders at this time. While en route to Boston he visited E.V. Keogh who was the Australian Army Medical Liaison Officer at the American Services Headquarters at the Pentagon, Washington. On leaving Boston he travelled to Montreal, Canada to visit J. Collip and H. Selye, to New York City to visit R. Loeb and to the Mayo Clinic, Rochester, Minnesota.)
- 1946 - 1956 : Work at the Clinical Research Unit began with establishment of an 18-bed ward and the introduction of liver biopsy using a Franseen needle to study abnormalities in the structure of the liver in chronic alcoholism. The studies expanded to include chronic hepatitis and led to the identification of an autoimmune component to the disease.
- : A system for gastric biopsy was developed which allowed studies to be conducted on various diseases of the stomach. Later in the 1950s these techniques were expanded to include biopsies of the duodenum and the upper small bowel. This represented a significant step in the opening up of the field of gastroenterology for scientific investigation.
- 1951 : Oxford University, England (Litchfield Lecturer).
- 1957 - 1963 : When F.M. Burnet announced in 1957 that the field of investigation at the Walter and Eliza Hall Institute was going to change from virology to immunology, the Clinical Research Unit also decided to direct its investigations into that field. However they continued studies into diseases of the pancreas and tetanus. The policy of the Unit 'was to investigate in the Institute and the Hospital cases of autoimmune disease to determine their nature, distribution

- 1957 - 1963
(cont.) and response to treatment. The cases were surveyed in terms of Burnet's theories, our own observations, and discoveries in the Institute and overseas.'
- 1958 : 'Diffuse lesions of the stomach' written with L. Taft (Published)
- : Washington, U.S.A. (Attended the World Congress of Gastroenterology.)
- 1963 : England and U.S.A. (Gave lectures in London and San Francisco on autoimmune diseases.)
- : Retired from the WEHI Clinical Research Unit.
- 1963 - 1978 : Royal Melbourne Hospital (Consulting physician).
- : Private consulting practice, East Melbourne.
(Shared rooms with G. Brown and visited the Heidelberg Repatriation Hospital, the Fairfield Infectious Diseases Hospital, the Alfred Hospital and Prince Henry's Hospital.)
- 1971 : Syme Memorial Lecture ('The Surgery Explosion: from Syme to Eternity').
- 1974 : Royal College of Physicians and the Royal Australasian College of Physicians (Neil Hamilton Fairley Medal; awarded for outstanding contributions to medicine.)
- 1975 : Stawell Oration and Medal ('The Great and Glorious Masterpiece of Man').
- 1976 : Created Knight Bachelor.
- 1978 - 1979 : Heatherton Hospital, Alcohol and Drug Dependence Branch of the Victorian Health Department (Part-time consultant).
- 1980 - 1986 : Spent much time working on his autobiography.
- 1983 : Distinguished Service Award (Medal) of Gastroenterological Society of Australia.
- 1984 : 'Discovery & Healing in Peace and War, An autobiography - Ian J. Wood' (Published).
- 1986 : Died 1 September 1986, Melbourne, Australia.
