GROUP 7. WAR AND RECONSTRUCTION

This section is indexed according to file name. It includes material relating to Downing's position as an Advisor to the Australian Government during World War II and its immediate aftermath. The material includes reports, correspondence, papers and articles on the role and function of Government during war and reconstruction. Much of the material bears no identifying name and is, also, the collective product of a number of advisors. Thus, an alphabetical listing of file names is the most useful form of index.
