These single needle lock stitch cylinder bed machines are used for work which cannot be conveniently handled on a flat bed machine.

The machines are regularly fitted with a universal button clamp for buttons from 14 to 36 lignes. When so ordered, a clamp to accommodate buttons varying from 26 to 46 lignes will be furnished.

After a button is attached the threads are automatically trimmed close to the underside of the work and the needle is raised to its highest point ready for starting the sewing of the next button.

The maximum speed of both machines is 1000 stitches per minute.
Buttons Sewn on by Machine 69-5

**Machine 69-5** sews four hole, two hole and bar buttons on clothing generally, the cylinder bed making it especially suitable for attaching buttons to knee pants, coat sleeves, etc. Each button is attached with 21 stitches, there being 18 cross stitches and 3 tying stitches.

**Machine 69-6** sews four hole, two hole and bar buttons (smaller sizes) on shirts, shirtwaists, underwear, etc. Each button is attached with 14 stitches, there being 11 cross stitches and 3 tying stitches.
