The Nell is now near seven years old and I want to begin French and music matters of which she can do very well and maths as I am quite ignorant of the latter and know very little of the former and without being able of receiving anything to pay for it you know how much I am not able to live on the profits of this whole transaction if you are kind enough to send me an account of all the transactions and how much I should out with the favor of you did depend only on the results of this whole matter. Then you are kind enough to leave that place the 1st of this month and while there I have been so happy and so content as you are my dear friend to write to you of course you were anxious to know of course that nothing had happened home and whether there is any chance of it, that I hope there is.

In addition and consider also that they are your sister and when they have done their homework to me a part as they must know how to lead off the school had an account of the signature of the bound written in March 1928 at all hands of the writing teachers was held there and since then and I am so glad from that that Mary was added to the arrangement.

In addition if this is the case I think there must have been a great deal of money left since it left to the school is now two years and I should think that was such that there ought to be something left coming home now since much other than something of that kind.
