Creator	Loewe, Fritz Philipp
Creator's Activity/Occupation	Academics - Meteorology - Explorers
Biography: Fritz Loewe (1895-1974) was educated at Koenigliches Joachimsthalsches Gymnasium 1904-1913; he then studied law and languages in Grenoble and Berlin 1913-14. Following war service he returned to Berlin, taking up geography, physics, oceanography and meteorology 1919-23, gaining a first class Ph.D. He participated in a number meteorological research projects during the 1920s and in 1929 became a member of Alfred Wegener's expedition to Greenland in 1930, becoming acting leader on Wegener's disappearance. Losing his position in 1934 due to Nazi persecution Loewe fled Germany with his family and initially worked at the Scott Polar Research Laboratory Cambridge 1934-7. Contact with the Vice Chancellor Sir Raymond Priestley led to his emigration to Australia where he founded Australia's first University meteorology department. His time at Melbourne was largely devoted to the establishment of the department and teaching, however he was involved in a number of research expeditions to Antarctica, including the aborted 1947 Wyatt Earp expedition and the 1950-51 Commandant Charcot expedition where he wintered in Adelie Land.

Scope and Content of Series

The Fritz Loewe Collection consists of three series of records which together documents Fritz Loewe's extensive meteorological and glaciological research. They contain a large volume of correspondence, papers, reports, diaries, notes, reference lists, data, graphs, maps, and other assorted records. These series offer testimony to the private life and significant scientific work of Fritz Loewe, particularly his research on Greenland (including his experiences on the Wegener Expedition in 1929-1930) and Antarctica (including his experiences on the Wyatt Earp Expedition in 1947 and the French Scientific Expedition in 1950-1951).

This series of Private and Professional Correspondence comprises an extensive set of letters spanning from the years of Fritz Loewe's childhood up until his death in 1974. The scope and scale of these records is testament to the vast network of family, friends and colleagues that surrounded Loewe his entire life. These letters show Loewe and his international peers exchanging ideas (particularly -but not only- scientific ideas) across the boundaries of countries, cultures and language, offering us a fascinating insight into the vast global scientific network that Loewe was a part of.

The level of language fluency we see in these letters is unique and impressive. Loewe seamlessly translates his own and others' work into other languages as needed. Loewe himself corresponds in German, English, French, Italian and Danish. It is through this language dexterity that the reach and richness of the global scientific network is constructed and maintained. These letters offer us a fascinating picture of the sharing of science and the constructive approach of Loewe and his peers as they engage with each other's work to develop their own.

This series also contains records that are important evidence of the lived experience of German Jews in Nazi Germany. These records include chilling documents relating to Loewe's trial for spreading anti-Nazi propaganda and his later dismissal from the German Aviation Ministry. Correspondence between Loewe and various University of Melbourne professors (including Vice Chancellor Raymond Priestley) from the 1930s offer insight into migration out of Germany at this time and the role that institutions such as The University of Melbourne played in assisting Jewish people escape Europe. In addition, correspondence between Fritz Loewe (after he had moved to Melbourne) and various German Jewish individuals and families back in Germany offer a moving picture of desperation and immigration in the 1940s.

Key correspondents in this series include (amongst many others): Fritz Loewe and his family; Johannes Georgi; Uwe Radok; Raymond Priestley; Phillip Garth Law; Lyndhurst Falkiner Giblin; Paul Weitze; Paul-Emile Victor; A. F. Liotard; Hans Schwerdtfeger; Werner Schwerdtfeger; Hermann Flohn; E. Vowinckel; Kurt Wegener; Douglas Mawson; David Rivett; Frederick White; and Charles Henry Brian (Bill) Priestley.

System of Arrangement

The papers of Fritz Loewe were first acquired by the University of Melbourne Archives in 1988 with small additions in the 1990s. When received in 1988 in three tranches, the collection was hastily arranged into groups by bringing together Loewe's records of expeditions, photographs and his publications. The archivists noted that a more thorough arrangement and description was needed. This proved elusive, however, because most of the records were written in German and needed a German speaking archivist to process them. Interest in the collection by researchers resulted in some unplanned rearrangement. In 2015, a box list was created by recording the details written in English on the front of each box at acquisition.

In 2018, the Archives was offered a grant to arrange and describe the Loewe Papers in detail. Two archivists were employed, one of whom was fluent in German. Their analysis of the Papers resulted in three broad series being gathered and described, all file titles recorded in English and German, and names of important events and correspondents being added to the descriptions to enable discovery.

Title: Briefe Vorkreig [Letters - Pre-War, 1931-1944]	Date: 1931-1944	Item Number: 2019.0020.00024	Unit/Box: 2019.0020 Unit 3
<p>Description: String bound bundle of letters sent to Fritz Loewe and/or Else Loewe. Also includes letters between Fritz Loewe and Else Loewe, a handwritten list of names (some professors) with annotations such as "died" or "deported" (undated) and Fritz Loewe's identity card for the XVI Olympiad, Melbourne 1956. Of particular interest in this inventory item is a draft letter by J. Georgi (draft sent to Else Loewe, final version later sent to the President of Police in Berlin) in support of Fritz Loewe who was detained by the Nazis in 1933. The letter details Fritz Loewe's accomplishments and immense value to Germany, with J. Georgi asking for these things to be taken into account by the judges on Loewe's case. The letter refers to the Wegener Expedition and Loewe's amputation of toes. The letter closes with 'Heil Hitler!' as all official letters did at the time of writing. The letter also includes a bibliography of publications that testify to the scientific contributions of Loewe, impressing his importance on the world stage. J. Georgi writes that Loewe should be thought of as enhancing the status of Germany in the eyes of the world.</p> <p>Topics include: General descriptions of friends, family, life and daily activities; The Wegener Expedition; Paul Weitze arranging for his family to leave Nazi Germany in 1939 but his unwillingness to leave Germany himself; The Weitze family (and Fritz Loewe's attempts to get the family a permit to come to Australia); J. Georgi being released from duty in 1936 and (to his dismay) his papers being published by someone else under their name; Ursula Meyer's guilt for having left Germany (letter dated 1941) and fear for Jewish friends and family back in Germany (letter dated 1943); Kurt Meyer's change of careers due to leaving Germany; J. Georgi receiving "the worst news I have had in years...I find it so hard to believe that your news is so far away from what is believable I feel I must ask you more information about it. I'm attaching to you a letter I wrote in a great hurry...in case you think it would be of use. I'd be very happy to send it to the authorities...if there are small changes you would like to make, send them back to me by postcard. As far as the money is concerned, I will put myself in touch with the authorities. If you see your husband, greet him from me and my wife. If there's any other way I can help you please tell me how. I am convinced that the current president of the Seewarte [Navy]...would be happy to write a good reference for your husband...hoping for a happy outcome to all this unhappiness" (letter from J. Georgi regarding Loewe's problems with the authorities, dated 28 August 1934); Robert's son Hein (last name unknown) dying a "herodeath" on the Russian front (Red Cross letter from Erna Gerwing, 17 November 1943); The Minister's investigation of Fritz Loewe and Fritz Loewe accepting the position in Cambridge in response to the investigation (letters from Fritz to Else Loewe, September 1934); The death of Fritz Loewe's mother; Fritz Loewe's frozen toes (letter from Ludwig Bruehl expressing his joy that Loewe survived the Wegener Expedition and offering sympathy on Loewe's loss of toes, 23 May 1931); The German "revolution" and the view that the German revolution would result in less death than the French or Russian (letter from Penck (?) who also advises Loewe that it is safer for him to stay in England than return to Germany and details what has happened to a number of their colleagues, 13 January 1936); The 1956 Melbourne Olympics.</p> <p>Senders include: Fritz Loewe; Else Loewe; Dorothy Derry (a friend of Loewe from the Cambridge days); J. Georgi; Ursula Meyer; Kurt Meyer; Paul Weitze; Lotte Weitze; Erna Gerwing; Ludwig J. Bruehl; Dulli; Heike (?).</p> <p>Language: English; German</p>

2019.0020 PRIVATE AND PROFESSIONAL CORRESPONDENCE OF FRITZ LOEWE 1862-1976

Title: Briefe, Wissenschaft und Wegener Expedition [Letters, Science and the Wegener Expedition, Folder 1 of 2, 1936-1957]	Date: 1936-1957	Item Number: 2019.0020.00033	Unit/Box: 2019.0020 Unit 4
<p>Description: Folder containing assorted correspondence, mainly extended correspondence with scientific colleagues including Hermann Peters, Manfred Kraus, Gerald Seligman, Wolfgang Hartke and Johannes Georgi, Carl Troll. Also includes personal correspondence, postcards, Christmas and greeting cards. Some names of correspondents are illegible. The voluminous folder was divided into two folders during processing. This section (Part 1) appears to have been arranged by Fritz Loewe by correspondent name as correspondents are grouped together with notes by Loewe interleaved. This original order has been retained as far as it could be reconstructed. Of particular relevance in this item are a set of letters from J. Georgi to Fritz Loewe with detailed descriptions of post-war life and reflections on the war. Note: Includes many handwritten notes for letters written on the back of University of Melbourne Council Meeting Minutes.</p> <p>Topics include: Research and publications on logarithms for rainfall frequency; A book on theoretical approaches to weather; Loewe's request to participate in a Japanese expedition to the Antarctic, 1957; Greetings and updates from 'Pelluk' (?) in Dublin, 1953; Dr. Albert Kolb curriculum vitae; Communication to Loewe regarding the fate of his school mates, undated but post WWII; the publication of 'The applications of thermo-neuclear explosion' (trans.) and other publications (regarding the harnessing of thermo nuclear energy for domestic power as a safer alternative to atomic power), 1956; Letters from Max Loder (from the immigration ship 'Castel Felice' and later from Greta Immigration Camp, NSW) introducing himself to Loewe, explaining their mutual acquaintances, describing his story, and asking for help in finding work in Australia. In a later letter, Loder describes his gratefulness in knowing Loewe, c.1955; The situation in post-war Germany; Supply packages; Carl Troll asking Loewe to consider coming back to Germany in the post-war period; Meteorological research by Carl Troll; Letter from Carl Troll demonstrating the vastness of the global meteorological network, 29 November 1952 (and others); The contribution and death of Meinardus; Proposal for Loewe to write a memorial about Meinardus in the Journal of Climatology; CV of Carl Troll; Letter from Loewe to 'Sir John' regarding Carl Troll's visit to Australia, 1949; Letter from Loewe to Carl Troll regarding the dangers of the destruction of forests, 1948; Loewe's reflections on a trip to the Antarctic during which the engineer drowned (letter dated 1 August 1948); Letter from the Geographahic Institute of the University of Bonn to Loewe describing how, for the first time since the end of the war, the German geographers have assembled for a conference and 'that the good old fashioned science still lives' (includes signed list of those at the conference), 23 August 1947; The economic climate in post-war Germany; Reflections on the Holocaust; Carl Troll's experience during the war and post-war years (including descriptions of the fate of Troll and Loewe's mutual friends and acquaintances, including detailed descriptions of what happened to a large number of German academics during the war period, 23 July 1946; Hertha Crohn; Comments on J. Georgi's publications and warming theory; J. Georgi encouraging Loewe to write about the Wegener Expedition; How the war isolated German scientists from developments in the rest of the world and how difficult it was to realign with the rest of the world after the world; 'Neujahrsblatt auf das Jahr 1952' (new year's memo offering reflections on the past year and reflections on a divided Germany and the possibility of reunification by J. Georgi and F. Jeorgi in 1952); Detailed descriptions by J. Georgi regarding post-war life (particularly in the</p>

Title: Uwe Radok-Loewe Letters [From Tatura Internment Camp, 1940-1942]	Date: 13 November 1940-1 May 1942	Item Number: 2019.0020.00038	Unit/Box: 2019.0020 Unit 5
<p>Description: Folder containing nineteen letters written by Uwe Radok to Fritz Loewe from the Tatura Internment Camp. Uwe Radok and his younger brothers, Jobst and Rainer, were interned after arriving in Australia on the Dunera in August 1939. Internees were permitted to write two letters a week, in English, which were censored. The first letter to Fritz Loewe, 13 November 1940, is in German. Loewe provided support and practical assistance to the family, including sending books and lecture notes, and advocating for Uwe and his brothers' release and future in Australia.</p> <p>Topics include: Conditions in the camps (The Radoks were moved between Tatura internment camps 1. 2. and 3. and conditions varied between camps); Establishment of Correspondence Courses; Obtaining books and study materials; Uwe Radok's meteorological studies; Jobst and Rainer Radok's matriculation results (Jobst and Rainer sat for matriculation subjects while interned. Rainer Radok became a distinguished mathematician); Assistance for a fellow internee, classical composer Walter Wurzburger (1914-1995); Progress of applications for release and possibility of immigration to America or Canada ("...The [British] Home Office...informed my brothers & myself - for the first time after more than two years of internment - that we have been classified as A-cases - that is as Nazis & criminals...", 7 November 1941"). The final letter (1 May 1942) includes a request for two new strings for Jobst's violincello so he can "continue playing in the camp orchestra & the string quartet group."</p> <p>Language: English; German</p> <p>Previous control number: 1988.0020 Unit 52/2</p>

Title: Briefe [Letters]	Date: 1971	Item Number: 2019.0020.00094	Unit/Box: 2019.0020 Unit 9
<p>Description: Envelope containing bundle of letters to/from Fritz Loewe (including personal and work related correspondence).</p> <p>Topics include: Letter of thanks for a speech given by Fritz Loewe at a conference in Harzburg, Germany about the Wegener Expedition; Descriptions of photographs and slides for a polar conference in Germany; Transcript (?) of a letter from Fritz Loewe's great uncle to Fritz Loewe on the day of Fritz Loewe's birth ("I'm so glad you're here. Everything here will appear very strange to you. You'll easily get used to things. If anything doesn't suit you, follow my advice and scream as loudly as you can. If your parents at the start do not concentrate on following your will, in the end they will give in and see sense. Do not withdraw. They know very well that you are not so stupid and they only need an excuse to give in to your wishes. I don't know whether you are interested in the question of workers or for the Pankower Institute [research institute in Potsdam, Germany]. In my opinion it would probably be better in the meantime not to concern yourself with this work and just let the Pankower Institute be. But if you do want to know something about it, don't hesitate to ask your grandfather. I can assure you that he will refuse you nothing. Have you already sorted out for yourself which troop you will serve with? I can only think that it would be the Blue Dragoons or the Hussars. But there's no hurry with the choice. You will soon find out with time that nothing is eaten as hot as it is cooked [old German idiom]. The telegram [?] which announced your arrival came an hour earlier than we expected so we supposed that you hadn't arrived yet and we drank quickly a glass to your well-being. If you're not used to Matze [a German food] I would suggest, in the meantime, don't eat it...Your uncle Felix is really looking forward to getting to know you and we all feel the same. I've got a lot more to tell you but I consider it's better that we should arrange a meeting together. For now, I don't want to tire you out too much. Give our love to your mum and your dad and your grandfather and your grandmother. Eternal fondest regards, your great Uncle Louis." Date of original letter is 11 March 1895. Date of this transcription is unknown.); Opportunities for polar research under the Nixon government in the US; Review of the writing of Mr Hardt on the German peoples' feelings of loyalty to the German royal family; Greetings from friends around the world; Discussion of what to do with materials gathered during the Wegener Exhibition by members of the journey.</p> <p>Senders/recipients include: Karl Weiken; Gerhard Schindler; Gertraud Repp; Mr Hardt; H.
